Description

The Fremont Police Department (FPD) is seeking Proposals from qualified vendors to provide a real time data visualization platform to serve as the key component in the Real Time Information Center (RTIC). Establishing an initial Standard Operating Procedure (SOP), procuring, integrating and implementing this platform is Phase 1 of a multi-phase approach for the FPD. Phase 2 will include day to day operations of utilizing the platform with existing staff, evaluation of the program, developing measures of effectiveness, and identifying future technology and personnel needs. Phase 3 will involve securing personnel position(s) as an operator in the RTIC. The final phase, Phase 4, if deemed necessary, will be to procure, install, and implement a video wall to complement the data visualization platform and its many displayed resources and data feeds. These subsequent phases will begin in Fall 2020 and likely take us into 2022 to complete the center. The focus of this RFP is implementation of the platform (Phase 1).

**REQUEST FOR PROPOSALS (“RFP”)
FOR A REAL TIME DATA VISUALIZATION PLATFORM**

- A.** The CITY OF FREMONT (hereinafter “City”) hereby requests Proposals for a comprehensive Real Time Data Visualization Platform for the Fremont Police Department. The City is also requesting software, data integration and professional services for implementation of the Real Time Data Visualization Platform (hereinafter “Project”). The City will receive Proposals at purchasing@fremont.gov **up to 2:00 p.m. on September 14, 2020. Maximum submittal size may not be larger than 35 megabytes otherwise we cannot guarantee delivery.**

Proposers who have experience with law enforcement agencies, specifically California implementations, data integration, CJIS compliance standards, and will meet the City’s requirements as outlined in the Functional Requirements section of this RFP are encouraged to submit proposals.

B. INTRODUCTION**1. General Description of Project**

The Fremont Police Department (FPD) is seeking Proposals from qualified vendors to provide a real time data visualization platform to serve as the key component in the Real Time Information Center (RTIC). Establishing an initial Standard Operating Procedure (SOP), procuring, integrating and implementing this platform is Phase 1 of a multi-phase approach for the FPD. Phase 2 will include day to day operations of utilizing the platform with existing staff, evaluation of the program, developing measures of effectiveness, and identifying future technology and personnel needs. Phase 3 will involve securing personnel position(s) as an operator in the RTIC. The final phase, Phase 4, if deemed necessary, will be to procure, install, and implement a video wall to complement the data visualization platform and its many displayed resources and data feeds. These subsequent phases will begin in Fall 2020 and likely take us into 2022 to complete the center. The focus of this RFP is implementation of the platform (Phase 1).

2. Project Purpose

This Request for Proposals is being completed with the goal of awarding an agreement to a Vendor to provide the real-time data visualization platform. The platform should provide a complete operational picture, offering solutions with a variety of third-party applications. The purpose of this RFP is to solicit submissions from vendors who demonstrate a solution to serve as described in the Functional Requirements and meet the overall project purpose.

3. Background

The Fremont Police Department (FPD) practices an Intelligence-led Policing (ILP) model and philosophy. ILP’s primary objective is to reduce crime through identifying crime trends, deploying effective resources and making informed decisions based on data-

**CITY OF FREMONT – REQUEST FOR PROPOSALS
REAL TIME DATA VISUALIZATION PLATFORM****RFP#21-008**

driven analysis, intelligence and technology tools. FPD greatly values our strong community partnerships and one such benefit has been the community support of the use of video surveillance technology throughout the City. FPD aims to establish a Real Time Information Center (RTIC), which is a hub of integrated information sources to include calls for service, crime trend information, technology, such as video surveillance and LPR, and personnel to facilitate real-time operational decision making. The goal is to improve situational awareness, increase operational effectiveness, quickly identify crime incidents and criminal suspects, and implement crime prevention strategies.

4. City's Current Environment

The City's network topology is based on Ethernet and consists of two core switches connected via a 10 Gbps WAN fiber link. Multiple VLANs are created to segment and secure the network utilizing a class A private network address space of 10.0.0.0/8.

Virtual servers run in a VMware vSphere/ESXi 6.7 environment. The virtual environment is based on Dell's VxRail hyper-converged infrastructure. Operating systems that are supported include Microsoft Windows Server 2012, 2016, and 2019. SQL Server 2012 and 2016 are the prevalent databases in use. The City's workstations and servers connect to edge switches at 1 Gbps. These edge switches have redundant fiber links that connect at 1 Gbps to each core switch. A Cisco next generation firewall is deployed to provide the latest technology to secure and protect the City's network. At the endpoints, workstations are protected against malware utilizing Cisco's advanced malware protection (AMP) and Umbrella DNS. Two internet service providers provide redundant routes to the internet for access to websites and cloud service providers including Microsoft Government Azure.

The workstations are primarily Dell desktops and laptops running the Microsoft Windows 7 and 10 operating systems. The City is currently migrating remaining Windows 7 workstations to Windows 10. Microsoft enterprise applications include Office 365, Exchange, Dynamics 365, Power BI, and Teams. ArcGIS enterprise 10.6.1 is used for our GIS environment. The Fremont Police Department is currently using Tiburon CAD 2.9 and RMS 7.10 solutions.

The City's disaster recovery plan consists of on-premise backups to a storage appliance in addition to sending backups to the cloud. Using a combination of Microsoft Azure and Amazon Web Services, virtual servers can be booted-up in the cloud as needed to ensure business continuity.

5. Proposed Application and Computing Environment

The City is open to both an on-premise or a Cloud Computing Type SaaS and/or PaaS solution (SaaS/PaaS solutions will require an acknowledgement, that if selected, the proposer will submit SOC1/SOC2 reports). If proposer offers both types of solutions (on-premise and cloud), present both. However, for proposals that are not SaaS or PaaS, the City will need to assess additional line items to the proposer's cost for maintenance, operations, storage, hardware, servers, networking components, respective licensing,

and other applicable components. The City expects the new system to operate in multiple environments: development, test, and production.

- b. If a proposer believes that any portion of its proposal is subject to a legal exception to public disclosure, the Proposer shall take the following actions: (i) clearly mark the relevant portions of its proposal “Confidential”; and (ii) upon request from the City, identify the legal basis for exception from disclosure under the Public Records Act; and (iii) the Proposer shall defend, indemnify, and hold harmless the City regarding any claim by any third party for the public disclosure of the “Confidential” portion of the Proposal.

Any attempt to intentionally or unintentionally conceal or obfuscate a conflict of interest will automatically result in the disqualification of a proposer’s proposal. An award will not be made where a conflict of interest exists. The City will determine if a conflict of interest exists and whether it may reflect negatively
