### The Valuation Process

The breadth and depth of the Audatex used vehicle database makes Autosource the most comprehensive market-driven valuation process available. Audatex has been determining locally sensitive, fair, and accurate market values for vehicles since 1985, with more than 30 million vehicles valued. The Autosource Market Value includes vehicles for sale at dealerships and private party sellers, starting right in the local market.

### Market Overview

#### What is my Vehicle Market Value based on?

**92376, Rialto California**--Research for your vehicle was based on market analysis originating from your zip/postal code.

Fair and accurate market valuations must balance geographic location with comparability of one vehicle to others. Having the largest and most current database of vehicles for sale provides a comprehensive view of your vehicle's market. In addition to the vehicle inventories received directly from dealerships, Autosource finds comparable vehicle information for vehicles in the same places most buyers look for them--local and national internet websites, vehicle guides, publications and partnerships representing more than 10,000 independent vehicle sources.

## How did Autosource make adjustments for my vehicle?

The main factors that affect the retail selling price and marketability of a vehicle are **odometer, equipment and condition**. Therefore, Autosource valuations include adjustments that fairly consider the differences between your vehicle and the typical vehicle found in the market.

### o Odometer

- Adjustments are made to account for the odometer differences between the loss vehicle and comparable(s).
- The odometer adjustment is based on \$0.0050 cents per mile specific to the 2005 Lexus IS300 STD 4D Sedan in the state of California. Odometer adjustments are capped at 40% of the vehicle's starting value.

### o Equipment

- Adjustments are made to account for the differences in equipment between the loss vehicle and comparable(s).
- Equipment adjustments are based on the manufacturer's retail price, adjusted for depreciation

### o Condition

- Typical condition is based on hundreds of inspected vehicles
- Condition adjustments are based on a percentage of the vehicle's value

Any warranties applicable to these replacement parts are provided by the manufacturer or distributor of the parts, rather than by the original manufacturer of your vehicle.

**Disclaimer:** Recycled part pricing may represent either actual pricing (the price at which the recycler is willing to sell the part for in its existing condition) or undamaged pricing (the price at which the recycler would sell the part if it was in undamaged condition).
