AB 1600 – Annual City Development Impact Fee Report (FY-2018/19)

City of Rialto

CITY OF RIALTO

**ANNUAL REPORT OF DEVELOPMENT IMPACT FEES
(AB 1600 REPORT)**

YEAR ENDED JUNE 30, 2019

BACKGROUND

In 1987, the Legislature passed AB 1600 better known as the Mitigation Fee Act, which established a process by which cities may impose development impact fees on new development to finance various public improvements to mitigate the impacts of new development on the community

A development impact fee is a monetary exaction other than a tax or special assessment that is charged by local municipalities to an applicant, most likely a developer, in connection with approval of a development project. The development impact fees are assessed for defraying all or a portion of the cost of public facilities related to the development project.

The legal requirements for enactment of a development impact fee are presented in the Government Code Section 66000-66025 the "Mitigation Fee Act." The fee must be reasonably related to the cost of the public facilities provided by the local municipality. If a development impact fee does not relate to the impact created by the development or exceeds the reasonable cost of providing the public facilities, then the fee may be declared a special tax and must then be subject to two-thirds voter approval. "Public facilities" are defined to include public improvements, public services, and community amenities. The power to exact development impact fees arises from the City's police power to protect the public health, safety, and welfare of its citizenry, if it does not conflict with state laws.

As the City is collecting the various types of impact fees, AB 1600 requires accounting for every fee collected. The funds collected for each type of impact fee must be recognized in a separate fund account and not commingled with any other revenue. Within 180 days after the last day of the fiscal year, the City must make available the following information:

- a brief description of the type of fee in each account or fund;
- the amount of the fee;
- the beginning and ending balance of the account or fund;
- the amount of the fees collected and the interest earned;
- an identification of each public improvement on which fees were expended and the amount of each expenditure;
- an identification of the approximate date by which the construction of the public improvement will commence;
- a description of any inter-fund transfer or loan and the public improvement of which the transferred funds will be expended;
- the amount of refunds made and any allocations of unexpended fees that are not refunded.

This report meets the requirements of AB1600. This report will summarize fund activity for all development impact funds from July 1, 2018 through June 30, 2019. In addition to the financial summary, a brief description of the current and proposed capital projects will be highlighted.

(1) For hotels with restaurants, the DIF for the hotel and the restaurant are calculated separately then added together.						
(2) For industry and heavy manufacturing, the DIF for an equivalent warehouse is calculated, and added to the DIF calculated for non-domestic sewer flow according to the formula: DIF = flow (gpd) * \$5.02 + BOD (lb/day) * \$1,007.38 + TSS (lb/day) * \$1,128.90
