Edgar

Daniel asked me to email you our process. Can you please give him my statement below?

City of Rialto Planning,

Titan Tire Recycling and Total Trucking Service are both owned and operated by one Family. Total is a woman owned business, if you need diverse companies that is us. We share the office and yard to save on our cost. The hours we are open are 5:00 am until 4:00 pm Monday through Friday. Total Trucking is an import and export transportation company. Titan Tire is a scrap tire recycler. Total Trucking is also the hauler for Titan Tire.

Titan Tire operates 5 box vans for tire pick ups and Total operates 9 tractors. Total Trucking exports the scrap tires to the port for Titan Tire by using the empty containers from our import customer. Titan's 5 Vans bring in 10 loads of tires per day 5 days. All of the recycling machines are inside the building. Drivers unload tires on a conveyor belt inside that goes directly to the machine. All tire recycling is done inside the building. Loading will be done on the loading dock. Cal-Recycle is the governing agent who we have to be permitted through. We have been in this industry for 30+ years now. We have never received any violations or had any closures with Cal-Recycle. They will be inspecting our facility on a regular basis to make sure we are operating a clean and safe facility. Cal-Recycle does these inspections 1-3 times per year unannounced and that keeps us operating in the manner they expect us to.

Titan Tire is the City of Rialtos scrap tire hauler. We will offer to host your cities amnesty day in our yard with no cost to your city. On an average your city spends \$4,500.00 per year for that service.

Chassis fees not included with any load will be billed back to customer at 35.00 per day. Per diem will be billed back to customer if invoiced to Total Trucking Service unless the empty was picked up before customers LFD.

Thank you,
Susan McClanahan
