### **Notice of Availability and Intent to Adopt a Mitigated Negative Declaration for the City of Rialto Rialto Baseline Storm Drain Project**

## COPY OF NOTICE

Notice Type: GPN GOVT PUBLIC NOTICE

Ad Description  
HZ-116 NOA-newspaper ver4

To the right is a copy of the notice you sent to us for publication in the SAN BERNARDINO COUNTY SUN. Please read this notice carefully and call us with any corrections. The Proof of Publication will be filed with the County Clerk, if required, and mailed to you after the last date below. Publication date(s) for this notice is (are):

09/18/2020

The charge(s) for this order is as follows. An invoice will be sent after the last date of publication. If you prepaid this order in full, you will not receive an invoice.

Publication	\$761.10
Total	\$761.10

The City of Rialto has prepared an Initial Study for the Rialto Baseline Storm Drain Project, which recommends that a Mitigated Negative Declaration (MND) be issued, and the City has authorized the release of the proposed Mitigated Negative Declaration for public review and comment for the above project.

The City of Rialto desires to upgrade existing drainage infrastructure conditions within Baseline Avenue from Cactus Basin west to Tamarind Avenue. The project consists of installing an approximately 2-mile or 11,000 lineal feet storm drain system within Baseline Road that would capture flows north of Baseline Road. The storm drain line starts at the Tamarind Avenue/Baseline Road intersection and runs along Baseline Road to the outlet at Cactus Basin No. 3. The new storm drain will be developed within a reinforced concrete box that will vary in size between 6' x 12', 7' x 7', and 3' x 10' depending on the location within the new storm drain alignment. The majority of the storm drain footprint (located within Baseline Road) will be constructed as a 84" reinforced concrete pipe, though a portion of the easternmost section of the alignment, which encompasses the section from Baseline Road to Cactus Basin, will vary in size as either a 72", 84", 48", 36", or 30" RCP. Flows leaving Basin No. 3 continue on to Basin 1 and 2 and Rialto Channel, which ultimately discharges to the Santa Ana River. Outflow from the Cactus Basin System are limited due to the poor downstream channel capacities.

The City has prepared an Initial Study and Mitigated Negative Declaration to evaluate the project impacts and has concluded the project will not have any significant negative impacts on the environment upon implementation of the recommended mitigation measures. A copy of the Initial Study and all other material which constitutes the record of proceedings upon which the City based its decision to adopt this Mitigated Negative Declaration may be

! A000005518282!

obtained at City of Rialto, Public Works/Engineering Division (Engineering Counter), 335 W. Rialto Avenue, Rialto, CA 92376. The 30-day public review period for the Initial Study begins September 18, 2020 and ends on October 19, 2020.

Any interested person or agency may comment on this matter by submitting their written comments before 5:00 pm on October 19, 2020. If you are interested in attending future public meetings for this project, submit your name and contact information or comments before 5:00 pm on October 19, 2020. Comments should be sent to Savat Khamphou, Public Works/Engineering Division, 335 W. Rialto, CA 92376. Please contact Mr. Khamphou at (909) 421-7210 or at [skhamphou@rialtoca.gov](mailto:skhamphou@rialtoca.gov) for additional information or if you have questions regarding the City's review process for considering the Mitigated Negative Declaration.
