Attn: Daniel Casey

Regarding: Site Operation Program | Master Case No. 2020-0001

Mr. Casey, below is a description of our site operation:

It will be a contracting company that operates 7 days a week anywhere from 6 am to 7 pm. Working on Sunday is rare. There are 6 units that haul trailers with our contracting equipment stored on the trailers. The company has 4 Ford F550s, 1 tractor, and 1 dump truck that pull the trailers. The types of off-road equipment hauled on these trailers are pavers, rollers, skip loaders and skid steers. The types of off-road equipment stored on the site trailers will vary depending on the type of contract we are working on at the time. There will be no paving materials stored in the yard.

The company employees 20 associates but most of these associates report to the job site and do not report to the company location. There will be no more than 7 employees at the location at any given time. On a typical day, each of the units will head out in the morning to a job site and then return back to our location at the end of the day. If there are any questions about the site operation please let me know.

X
